PROFESSIONAL SUMMARY

Computer Science Engineering student with practical experience in full-stack web development using the MERN stack. Proficient in building web applications, RESTful APIs, and backend systems. Strong foundation in Data Structures and Algorithms, DBMS, Operating Systems, and Computer Networks, with an interest in software development and AI applications.

EDUCATION

B.Tech in Computer Science Engineering | Parul University [2023–2027]
Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, DBMS

PROJECTS

Government Services Platform (GOV DESK)

- Built a government services platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Integrated the Google Maps API for location-based government office search and navigation.
- Added service categorization and an accessible UI to improve navigation and usability.
- Designed REST APIs for efficient data retrieval and service information management.

AI-Hiring Platform

- Developed a hiring platform using React.js, Node.js, Express.js, and MongoDB with integrated AI capabilities.
- Integrated the OpenAI API for automated interview analysis and candidate skill evaluation.
- Implemented live video interview functionality using WebRTC and Socket.io.
- Created a recruiter dashboard for candidate ranking, assessment tracking, and interview management.
- Designed secure backend APIs and database models for user authentication and data handling.

SKILLS

- **Languages:** Java, JavaScript, Python, C
- **Frontend:** React.js, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, MySQL
- **Tools:** Git, GitHub, VS Code, IntelliJ IDEA
- **Core CS:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved 70+ DSA problems on LeetCode.
- Built multiple MERN stack projects.

CERTIFICATIONS

Artificial Intelligence Fundamentals — IBM Skills Build and Cisco Networking Academy

- Learned core AI concepts including machine learning fundamentals, neural networks, and real-world AI applications
- Studied ethical considerations in AI systems and responsible data usage

AWS Academy Cloud Foundations— AWS

- Built foundational knowledge of cloud computing, AWS core services, and deployment models
- Developed understanding of cloud architecture, security basics, and virtualization

Design and Analysis of Algorithms — CodeTantra

- Covered algorithm design techniques and time and space complexity analysis (Big-O notation)
- Strengthened structured problem-solving and optimization thinking
